

procedures, error rates, peer review, and general industry acceptance. Further, the vendor may be required to provide technical and expert support for litigation to support the application's capabilities and to establish cases against violators. If the vendor's application has previously been subject to such scrutiny in a court of law, the vendor should describe the evidence and any court finding on the reliability of the application.

Additionally, to maintain the integrity of the e-log application for fisheries management, the vendor will be required to sign a non-disclosure agreement limiting the release of certain information that might compromise either the confidentiality of fishermen's personally identifying information or proprietary fishing data. The vendor shall include a statement confirming its agreement with these conditions. The scope of litigation support may include, but is not limited to, technical capabilities of the e-log application, e-log application support and training content, alterations to the e-log application, and data content and history.

A vendor may voluntarily retire a certification to terminate its obligation to provide litigation support for the product; such action must be in writing to PIFSC. The vendor's obligation to provide litigation support will end 180 calendar days after such notification is received. If a certification is retired, the e-log application is no longer available for use in the fishery.

Change Control

Once an e-log application is certified, it is the responsibility of the vendor to notify PIFSC of any change in its submission, such as a change affecting hardware or software components, performance characteristics, or customer support services or contacts. PIFSC reserves the right to reconsider and revoke the certification if, as a result of the change, the vendor's application is deemed to no longer satisfy PIFSC reporting and recordkeeping requirements. The vendor must report to the PIFSC e-log technical panel (as described in the Certification Guidelines) any changes to the certified product, along with updated copies of the new configuration prior to deploying the changes to customers. If the change affects the e-log application components used to meet the requirements, PIFSC may require re-evaluation and possible recertification. The technical panel will notify the vendor within 30 days with a recertification statement which will say whether a recertification is required and

if so, why and when the recertification would be completed. The vendor may report planned changes to the certified e-log application to PIFSC and request an advisory recertification statement within 30 days. The vendor is permitted to provide quick code upgrades for customers to handle critical defects; however, the vendor must report the code change to PIFSC prior to deploying the change to a customer.

Advertising Prohibition

Once a product is certified, the vendor may state that the product is "certified for electronic logbook submission for the Hawaii pelagic longline fishery." However, the vendor must not use in the vendor's name or the product name, or claim endorsement of the e-log application by, any of the following: NOAA, NMFS, PIFSC, or PIRO.

Expiration of Certification

The certification expiration date for a product is determined by changes to PIFSC reporting requirements and reporting activity by product users. Additionally, PIFSC may set an expiration date for a certification based on other requirements. PIFSC will notify the vendor at least 120 days prior to expiration. PIFSC will set an expiration date for a certification if the product has not been used to submit an electronic logbook for three years.

Revocation of Certification

PIFSC may revoke certification of a product if any of the following occurs:

1. PIFSC repeatedly receives inaccurate or incorrectly formatted electronic logbooks and the error is traced to a defect in the e-log application;
2. The vendor modifies a certified e-log application without reporting the modification to PIFSC; or
3. The vendor violates advertising prohibitions.

If a certification is revoked, the e-log application is no longer available for use in the fishery.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: June 30, 2009.

Alan D. Risenhoover,

*Director, Office of Sustainable Fisheries,

Foreign-Trade Zones Board

[Docket 20-2009 and 22-2009]

Foreign-Trade Zones 29 and 203 Applications for Subzone Authority Dow Corning Corporation and REC Silicon; Notice of Public Hearing and Extension of Comment Period

A public hearing will be held on the applications for subzone authority at the Dow Corning Corporation (Dow Corning) facilities in Carrollton, Elizabethtown and Shepherdsville, Kentucky (74 FR 21621-21622, 5/8/09) and at the REC Silicon facility in Moses Lake, Washington (74 FR 25488-25489, 5/28/09). The Commerce examiner will hold the public hearing on September 1, 2009 at 1 p.m., at the Department of Commerce, Room 4830, 1401 Constitution Ave., NW., Washington, DC 20230. Interested parties should indicate their intent to participate in the hearing and provide a summary of their remarks no later than August 28, 2009.

The comment period for the cases referenced above is being extended to September 16, 2009, to allow interested parties additional time in which to comment. Rebuttal comments may be submitted during the subsequent 15-day period, until October 1, 2009. Submissions (original and one electronic copy) shall be addressed to the Board's Executive Secretary at: Foreign-Trade Zones Board, U.S. Department of Commerce, Room 2111, 1401 Constitution Ave., NW., Washington, DC 20230.

For further information, contact Elizabeth Whiteman at Elizabeth_Whiteman@ita.doc.gov or (202) 482-0473.

Dated: June 30, 2009.

Andrew McGilvray,
Executive Secretary.
